SUMMARY

Before Green Fox Academy, I worked as a social worker. Recently, I organized the travelling and care services for people with disabilities at an independent association. A friend recommended GFA to me, and I instantly developed a passion for coding. During my time at GFA, I discovered great joy in exploring the complexities of programming languages and creating practical applications.

MOTIVATION

Coding requires a lot of abilities like creativity, logical thinking, problem-solving skills, attention to detail, patience, perseverance, and adaptability. That's why I instantly developed a passion for coding. This newfound passion has ignited a profound sense of purpose within me, driving my continuous pursuit of learning and growth in the field. The IT industry also offers a compelling combination of flexibility, boundless opportunities.

LANGUAGES

HUNGARIAN Native
ENGLISH Professional working proficiency

LANGUAGES AND TECHNOLOGIES

Languages and frameworks: .Net, Javascript, Typescript, Node.js / Express, React, HTML, CSS, Next.js
Technologies: Jira, Git, GitHub, GitLab, MySQL, SQL

PROJECTS

February 2023 - June 2023

FoxShop Project

Green Fox Academy

Building a second-hand marketplace where users can sell and buy used electrical devices and other products that can be put in pre-defined categories.

Developing the application from scratch, within a 5-person development team. The web application offers as additional functions:

- user registration and log-in
- advertisements placement, browsing and management
- category based searching
- messaging services between seller and buyer
- frameworks: **Next.js** for frontend, **ASP.Net Core** for backend
- database: **MySQL**
- testing: Jest and xUnit.net
- architectural style: **REST API endpoints**
- project management: **SCRUM** methodology(**Jira**), **Git**, including the **GitHub** platform, for collaborative development.
